Health Care Aide

Students interested in completing Health Care Aide courses can begin the program through Dual Credit. The program has been designed in five sections to be taken sequentially over the course of a student's senior high school program. The program is flexible, allowing students the option to step out of the program and into other CTS pathways or to continue on to post-secondary studies after high school completion.

Prerequisite: Students must have successfully completed English 10-1 or 10-2 prior to beginning Health Care Aide courses.

Students gain hands on experience in a work setting allowing them to apply and put into practice knowledge and skills learned in theory and lab courses taken.</p>	<p>HCA3530: Clinical Practice 2</p>

Health Care Aide FAQs

What is the lab component ?

Each Health Care Aide section requires participation in a one day lab to be completed at Lakeland College in Lloydminster. Each lab is designed to give students hands on experience, and must be completed in order to receive the Lakeland College credits and continue in the program.

When are the labs?

Lab dates will be scheduled by the College prior to the start of all sections. Students and schools will be made aware of lab dates. Transportation arrangements to the lab day are the responsibility of the school and/or student. Failure to complete the lab will result in non-completion of the Lakeland College credits and students will not be able to continue in the program.

Do the labs have to be done at the Lloydminster Campus of Lakeland College?

Yes. This is because this is a provincial curriculum, and the lab has to be taught and overseen by a licensed professional. If a student wants to continue with the program and get the Lakeland College credits they must attend the lab dates.

What is the passing grade for HCA?

In order to pass each section of the program, students must receive a 70%. They cannot move on to the next Section and complete the program unless they have received the required 70% in the previous section.

Can a student take English 10-1/10-2 in the same semester as HCA?

No. This is a prerequisite, so a student has to have successfully completed English 10-1 or 10-2 prior to enrolling in the Health Care Aide Program.

Can a student take more than one Health Care Aide section in one semester?

No, each section is a pre-requisite for the next.

If a student does not finish the program in High School, but would like the HCA certificate can they complete the course at Lakeland College?

Yes. If they have attended the lab dates, and have received the required 70% in the sections that they have completed, they will be able to apply for the HCA program at Lakeland College, and finish the sections they have left to complete. Please see our website for more information: <http://lakelandcollege.ca/academics/health-wellness/programs-and-courses/health-care-aide/>

Do the Lakeland College Credits transfer to other Post-Secondary Institutions?

Each institution has their own admission requirements. If you would like to know the admission requirements of other Post-Secondary Institutions you would have to check with them individually.

Is there more information on the practicums that students have to complete?

There are two practicums in this program. The first practicum is in Section 3 and is 40 hours; the second is in Section 5 and it is 4 weeks long. Students gain hands on experience in a work setting allowing them to apply and put into practice knowledge and skills learned in theory and lab courses taken. The Instructor for the program sets up the practicums for the students and is on-call during this time.
